

# We thought you might like to know why patients come here!

Our survey of 347 patients selected from progress examination findings, from the past three years, found when patients presented to the clinic:

**3 in 10** were experiencing **neck pain**

**76%** had **back, mid-back** and/or **shoulder pain.**

**1 in 10** were experiencing **headaches**

We asked them how they felt they had progressed:

**Over half** felt improvements in their **exercise** and **walking**

**3 in 5** felt they could **sleep** and/or **sit better**

**61%** thought their **improvement** was **progressing faster** or at the **speed they expected.**

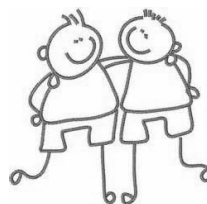

**3 in 4** felt their **overall movement** had improved

When asked to provide feedback on chiropractic and our clinic:

**1 in 4** felt they had **learnt a lot** from the information we provided them **on Chiropractic**

**3 in 5** felt that **chiropractic** had **significantly helped** their initial problem

**98%** thought our **Chiropractors** were **friendly, caring and efficient**

**97%** would **refer a family member or friend** to our clinic
